# Colour time

Bringing in unexpected splashes of colour can breathe personality into the bathroom.

Throughout its 125-year history, Rogerseller has continued to bring innovation and a selection of local and internationally designed products to Australian shores. Rogerseller collections are curated with the contemporary bathroom in mind, as a place of comfort and high-end design. Alongside colour options to transform and lighten up every kind of bathroom space.

#### *PASTEL POPS*

Falper, Claybrook and Catalano headline a list of brands whose products incorporate pastel hues and statement colours for the modern bathroom.

Falper's products are the result of collaborations with industry professionals that infuse a unique identity into each item. The personalisation possibilities are nearly endless thanks to the range of colours and natural finishes across Falper's Cristalplant and Ceramilux ranges.

Citing a British understanding of quality and craftsmanship, Claybrook's range contains an assortment of colours and finishes tailor-made for any bathroom project. The new Terrazzo collection is particularly colourful and on-trend, perfect for contemporary Australian bathrooms.

#### *METALLIC MUSES*

Catalano's Colori collection gives new possibilities for personalising the bathroom, from basins to toilets and bidets. Colori is available in gloss white, matte white, matte cement grey, matte black, silver or gold, so you can choose to add subtle texture or make a strong statement.

For those looking for a more natural, honest finish to their bathroom products, Fantini and Rogerseller's own bathroom pieces are perfect, all combined with premium manufacturing practices.

Rogerseller's Natural Elements range of finishes captures the textures and hues of raw, organic materials. The five finishes – chrome, graphite, matte black, brushed nickel and brushed gold – match perfectly to materials such as timber and natural stone, combining to create rich, tactile environments with a contemporary elegance.

Fantini has been featuring colours in tapware design since 1977 when the iconic, pop art-inspired I Balocchi collection was born in collaboration with designers Paolo Pedrizzetti and Davide Mercatali. Today's colour range spans from timeless matte black and matte white, sophisticated PVD matte copper, british gold and matte gun metal, to refined gold plus and polished nickel.

Whether going left of centre with a pastel hue, or combining a classic metallic with other finishes, Rogerseller has a complete range of colours to lighten up your bathroom.

**OPPOSITE** Fantini's range of finish options is both timeless and sophisticated

**ABOVE & TOP** Falper and Claybrook both offer bright, pastel-hued options for those wanting to inject some fun
