Dezeen staff | 27 July 2021

**Dezeen Showroom:** designed by Andrea Federici for Falper, the Butler cabinet system helps to make the bathroom feel like an extension of the living space.

The Butler cabinet system can be configured with shelves, internal drawers and clothes rails, allowing decorative objects to be displayed and useful items stored.

The Butler cabinet system makes the bathroom an extension of the living space

It is part of Falper's "lifestyle bathroom" philosophy, which imagines the bathroom as part of the living environment of the home, where functionality and aesthetics are in harmony.

The wall-mounted Butler cabinet system is available in a choice of two depths – 20 or 35 centimetres – and an array of finishes.

The column-based system is configurable with shelves, drawers and clothes rails

Aluminium, glass, solid walnut or oak, and matt and glossy lacquer finishes are among the options for embellishing the details of the cabinet.

There is also the possibility to add LED interior lighting and drawer accessories.

**Product:** Butler

**Designer:** Andrea Federici

**Brand:** Falper
