

Small Living Kitchens™ by Andrea Federici for Falper

Project selected among the 10 must-see exhibitions in the Brera design district, for our DWalking guide dedicated to Milan Design Week 2022.

Small, prestigious, convivial: Small Living Kitchens™ is a totally brand new system designed by Andrea Federici for Falper that maintains the high standards and convivial layouts of large kitchens in previously unimagined compact spaces as small as just 2.5 square meters.

Display-worthy objects create a sophisticated kitchen space that flows effortlessly into refined living areas and suite-hotels. Ideal for new generation smart homes.

With a rational, simple and recognizable design made up of a few essential and modular elements that can be combined in infinite compositions, this new system is synonymous with uncompromising quality: *Live Large in a Small Space*.
