Small Living Kitchens by Falper

BRAND Falper

DESIGNER Andrea Federici

Falper presents Small Living Kitchens, a new concept exclusively patented by the brand that revolutionises the experience of the kitchen in small, prestigious dwellings. It is a totally new concept that maintains the high standards and convivial layouts of large kitchens in previously unimagined compact spaces as small as just 2.5 square metres. Designed in collaboration with Andrea Federici, Small Living Kitchens is simple in design, made up of just a few elements – Islands, Storage Units and Tall Units – that can be combined to create infinite configurations. Islands, Storage Units and Tall Units are arranged according to a principle of rational design that combines finished elements, positioning them in the space in a simple way, like living room furnishings, without the need for complex bespoke solutions.
