

SALONE DEL MOBILE 2022 – REVIEW EUROCUCINA

The essence of the kitchen

It's been four years since EuroCucina was last held. A lot has happened since then, including in the kitchen. We have taken a look around and show the innovations and trends of the International Kitchen Furniture Exhibition.

The "Small Living Kitchens" collection from Falper, which is now extending its portfolio of high-quality bathroom furnishings to kitchens, was presented in a very compact form. These are made up of islands, cabinets and tall units and are designed to provide the comfort and functionality of large kitchens in a much smaller space. The modular elements can be freely combined and positioned in the room. Here, too, the living room furnishings serve as a model, which can be seen, among other things, in the materiality, such as the elaborate wood-grain veneer of the surfaces or the drawers made of solid walnut.
