## 3 SMALL LIVING KITCHENS

Extending its expertise to the kitchen for the first time, bathroom manufacturer Falper partnered with Italian designer Andrea Federici to create a system specifically for small-space living. The series includes three island sizes, a storage unit and tall cabinets, all with simple designs and refined finishes (stainless steel, marble, wood, and matte and glossy lacquers). Its components, including sinks, gas or induction hobs and other accessories, can be combined in multiple ways. [falper.it](http://falper.it)
