

CARE AND MAINTENANCE INSTRUCTIONS

Lacquered

Material Characteristics

The lacquered finishes are handcrafted on E1/Carb2 MDF panels using water-based paints on a polyester base suitable for humid environments. For glossy lacquers, the process also involves direct lacquering in multiple layers, ensuring a uniform, excellent, and long-lasting brilliance.

No odor, no styrene emissions: everything is water-based and entirely natural to the touch. The product is non-toxic or harmful to humans, animals, or the environment. The MDF panels used are E1/Carb2 certified, with limited formaldehyde emissions.

Colors may exhibit slight tonal differences compared to the sample in our lacquered color swatch, caused by material variations and reflections. Such tolerances are considered accepted during the ordering process.

For particularly dirty areas or stains, please contact our Falper Customer Care at customercare@falper.it.

CARE AND MAINTENANCE INSTRUCTIONS

Lacquered

To always keep the surface in the best condition, it is recommended to pay particular attention to the maintenance phases of the artifact.

Recommendations:

- We recommend using a soft cotton or microfiber cloth and non-abrasive neutral liquid detergents.
- Clean the furniture with a soft cloth or damp non-abrasive sponge or with diluted ethyl alcohol.
- All operations should be carried out carefully to avoid scratching or polishing the surface.

Not recommended:

- Avoid products containing ammonia, acetone, chlorine, solvents, and abrasive products.

CAUTION: Absolutely avoid detergents containing ammonia and/or solvents and ethyl alcohol, regardless of their concentration and even if diluted, as they can attack the material. Do not use excessively abrasive tools. Avoid rough and abrasive sponges, metallic scrubbers. Coffee and tea can permanently stain the product.

For particularly dirty areas or stains, please contact our Falper Customer Care at customercare@falper.it.
