

# **CARE AND MAINTENANCE INSTRUCTIONS**

## Metal

### **Material Characteristics**

Steel elements are made of AISI 304 steel and are handcrafted with exceptional bending and welding. Finishes are applied using galvanic finishing, sanding, and manual painting procedures. These treatments give the surface a deep, satin effect that is particularly pleasant to the touch and highly durable.

# **CARE AND MAINTENANCE INSTRUCTIONS**

## Metal

To always keep the surface in the best condition, it is recommended to pay particular attention to the maintenance phases of the artifact.

#### Recommended:

- Clean the product with a soft cloth or damp non-abrasive sponge.
- All operations should be carried out carefully to avoid damaging the finish.
- For recessed areas, use a soft brush to remove dust along the joints.
- Thorough rinsing is important after using cleaning products.

#### Not recommended:

- Avoid products containing ammonia, acetone, chlorine, solvents, and abrasive products.
- Do not rub, do not insist.

**CAUTION:** Absolutely avoid detergents containing ammonia and/or solvents and ethyl alcohol, regardless of their concentration and even if diluted, as they can attack the material. Do not use excessively abrasive tools. Avoid rough and abrasive sponges, metallic scrubbers. Coffee and tea can permanently stain the product.
