

Cristalplant Color

Material Characteristics

Colored Cristalplant is durable, easy to clean, and offers endless creative possibilities. Derived from polyester and acrylic resins, this material provides a wide range of vibrant colors and a unique appearance.

Cristalplant® is known for its beauty resembling natural stone with a soft-touch effect. It is a fully recyclable, hypoallergenic, and non-toxic material.

Care and Maintenance Instructions

To always keep the surface in the best condition, it is recommended to pay particular attention to the maintenance phases of the artifact.

Recommendations:

- Use a soft cotton or microfiber cloth and diluted non-abrasive neutral liquid cleaners.
- Thoroughly rinse after using cleaning products.
- Colored detergents should not be left on the surface but should be removed immediately.

Not recommended:

- Do not use aggressive chemicals such as acetone, trichloroethylene, acids, or strong bases.
- Avoid the use and contact of products containing *sodium hydroxide (e.g., caustic soda, sink unblocker, toilet unblocker).
- Industrial cleaners with unknown aggressiveness.

CAUTION: Absolutely do not use cleaners containing acetone, trichloroethylene, hydrochloric acid, and caustic soda, regardless of their concentration and even if diluted, as they tend to attack the material.

Note: In case of scratches or burns, do not sand the product.
